

Thank you for your purchase of an Orgone Amplifier! We worked hard to design a system that puts the power of a cloudbuster into a compact and portable device.

Connecting Antennas

OA-1000: this model is designed to accept one antenna. Connect antenna to the port by threading clockwise.

OA-2000 – this model is designed to accept two antennas. The extended frequency antenna (longer) is threaded clockwise onto the left port and the 5G antenna (shorter) is threaded onto the right port.

Dial Information

Intensity-The left knob of the device controls the intensity, from minimum to maximum, the dial reads 0-100%. A setting of greater than 90% intensity and the circuit attains the maximum range. The OA-1000 has only an intensity dial.

Frequency- The frequency dial (not present on OA-1000) will control the ratio of feedback signal between the two antenna ports. The dial has a scale of 0-100% and acts as a filter to select a range of frequencies. A setting of 0% will pull feedback from the lower frequency of the spectrum, picked up by the extended frequency antenna. A setting of 100% will use mostly the 5G antenna for feedback. When the frequency knob is at 50%, the device will pull feedback from a mix of both antennas. Similar to an analog radio, the user can tune to the desired frequency and intensity. OA-1000 models will always pull feedback over the full range of the attached antenna.

Care Tips

Environment

Temp: -10degF to +120degF **Water Resistant:** Yes, Do not submerge, Do not Freeze in ice. Dry thoroughly after use. **Over voltage:** Do not expose to any voltages above 5V

Batteries

Replace both batteries at the same time, from the same package.

Alkaline batteries Recommended, Lithium Rechargeable OK, NiMH Rechargeable not Recommended, but will work. Remove Batteries from unit Before Recharging.

Batteries will last for up to 7m+ below 30%, but will exhaust itself 2 weeks when intensity dial is above 90%.

Storage

Store in a cool, dry, dark place. Do not crush. Secure during transport. Extended storage (6mo+) remove batteries from case and store separately. Follow all directions from the battery manufacturer.
